

ProPresenter 7

TRAINING

THE BASICS

Introduction

1. What ProPresenter can do for you

We look at all the features and possibilities that ProPresenter offers you

2. User Interface and Layout

Once you understand how ProPresenter is laid out and why it is designed this way you will be able to quickly and easily make changes on the fly

3. Organization and File Naming

These are vital skills to keep ProPresenter working smoothly over time

Terminology & Definitions

One of the hardest parts of ProPresenter is understanding the terminology and definitions that it uses. Think Playlists, presentations, layers, screens, themes and more

Screens & Layout

I take you step by step to setup your screens in ProPresenter. Whether it is a single screen, or you are running multiple audience and stage screens we will have you up and running in no time.

Creating and Editing Slides

How do you create a slide? How can you add a timer? What about fonts and shapes and images and colors and sizes? After this you will know all this and more.

Themes and Looks

Learn how to create themes and looks so that you can take one slide and make it look different on different outputs at the same time.

ADVANCE TRAINING

Importing and adding media

Learn how to add and import different media types. This includes:

- Song lyrics from pdfs or the internet
- Images
- Videos
- CCLI
- Song Select
- Multi Tracks
- Audio

Leveraging Layers

ProPresenter uses different layers such as background, announcements, props, audio, video and slides.

Advanced Features

ProPresenter can do so many things it just depends how you want to use it. In this section we will include tutorials such as:

- Stage screens
- Timers
- Countdown clocks
- Audio Channel Mapping
- Livestreaming
- MIDI
- NDI options
- Macros
